

Commercial Fiberglass Services Reference

BLG Fiberglass - Buyer Reference 2026

Core Manufacturing

1 Tooling and mold building

Where much of the up-front cost and quality is set.

2 Multiple molding processes

Hand lay-up, spray-up, RTM, light RTM, and SMC.

3 Trimming and machining

Bringing molded parts to final dimensions.

Engineering and Finishing

1 Material and laminate selection

Right resin, reinforcement, and layup for the job.

2 Design for manufacturability

Making sure the part is moldable at your volume.

3 Bonding and finishing

Sub-assembly, gel coat, paint, and surface finish.

4 Inspection and quality

Delivering a finished, inspected component.
