

Fiberglass Material Sourcing Checklist

BLG Fiberglass - Buyer Reference 2026

Before You Order

1 Specify by property

Resin type, viscosity, gel time, reinforcement weight and weave.

2 Request data sheets

Technical and safety data sheets for every product, kept on file.

3 Confirm lot handling

How the supplier manages lot-to-lot variation and lot reservation.

4 Check lead time and shelf life

What is in stock, how fast reorders ship, how long it keeps.

Qualify and Track

1 Run a qualifying sample

Test a small batch through your real process before volume.

2 Verify each lot on receipt

Check incoming material against its data sheet and CoA.

3 Document lot numbers

Trace any defect back to a specific source and lot.

4 Size orders to usage

Turn stock over before resins and catalysts expire.
